

# Klipp Und Klar A1 B1 Pdf Download

**Solución:**

Se sabe que para una tubería la velocidad máxima es cuando pasa por el eje:

$$\begin{aligned} V_{max} &= \frac{V_c}{k} \ln \frac{30(2R)}{k} \\ \frac{V_{max}}{V_c} &= \frac{1}{k} \ln \frac{30(2R)}{k} \\ \frac{V_{max}}{V_c} &= \frac{1}{k} + 2.3 \log \frac{30(2R)}{k} \\ \frac{V_{max}}{V_c} &= \frac{2.3}{k} \log 60 + \frac{2.3}{k} \log \frac{R}{k} \dots (2) \end{aligned}$$

También sabemos que la  $V_c$  en una tubería es:

$$\begin{aligned} V_c &= \frac{V_c}{k} \ln \frac{13.4R}{k} \\ \frac{V_c}{V_c} &= \frac{1}{k} \ln \frac{13.4R}{k} \\ \frac{V_c}{V_c} &= \frac{1}{k} + 2.3 \log \frac{13.4R}{k} \\ \frac{V_c}{V_c} &= \frac{2.3}{k} \log 13.4 + \frac{2.3}{k} \log \frac{R}{k} \dots (3) \end{aligned}$$

Reemplazamos (2) y (3) en (1):

$$\begin{aligned} \frac{V_{max}-V_c}{V_c} &= \frac{2.3}{k} \log 60 + \frac{2.3}{k} \log \frac{R}{k} - \left( \frac{2.3}{k} \log 60 + \frac{2.3}{k} \log \frac{R}{k} \right) \\ \frac{V_{max}-V_c}{V_c} &= \frac{2.3}{k} \log \frac{60}{13.4} + \frac{2.3}{k} \log \frac{\frac{R}{k}}{\frac{R}{k}} \\ \frac{V_{max}-V_c}{V_c} &= \frac{2.3}{k} \log \frac{60}{13.4} + \frac{2.3}{k} \log 1 \\ \frac{V_{max}-V_c}{V_c} &= \frac{2.3}{k} \log \frac{60}{13.4} + 0 \\ \frac{V_{max}-V_c}{V_c} &= \frac{2.3}{k} \log \frac{60}{13.4} \\ \frac{V_{max}-V_c}{V_c} &= 3.73 \end{aligned}$$

**10. Calcular el valor de**

$$\frac{V_{max}-V_c}{V_c}$$

Para un canal con turbulencia plenamente desarrollada.

**Solución:**

Se sabe que para una canal la velocidad máxima es cuando pasa por el eje:

$$\begin{aligned} V_{max} &= \frac{V_c}{k} \ln \frac{30(2R)}{k} \\ \frac{V_{max}}{V_c} &= \frac{1}{k} \ln \frac{30(2R)}{k} \\ \frac{V_{max}}{V_c} &= \frac{1}{k} + 2.3 \log \frac{30(2R)}{k} \end{aligned}$$

The cause of high cost of China leather industry is poor quality and low price of China leather which can not meet the demands of the customers and the competition. China leather industry is severely facing new challenges in the future. The exploitation of China leather industry will become increasingly difficult and challenging. Germany, Italy, Britain, France, and other countries have entered the competition to promote the development of the China leather industry and the supply chain of products. The future development of the China leather industry needs an innovation and the skills development of raw material manufacturers, leather manufacture. Meanwhile, the technology innovation and technical transformation of the people in the China leather industry can be gained through the development of new technology. China leather industry will be in a critical period of change. However, the current situation has still been developing new products. The formation of China leather industry has been a tough road. The 2016 report on China leather industry, the China leather industry is expected to grow rapidly and achieve new heights in the next ten years, but it will also encounter the difficulties such as the shortage of raw materials. Leather in general is a versatile material and a value-added product, which has excellent performance in both indoor and outdoor uses. Leather manufacturing process is very complex and the course of the industry is long. So, the future development of China leather industry is very uncertain. What are the main achievements of the company in the past?China Leather Industry, China Leather Industry Service Co., Ltd. was established in 1996. The company is a leading manufacturer of leather products in China. The company has always focused on quality, efficiency, innovation, and technology. With strict quality control, the company has won the trust of a large number of customers. According to the world's top three leather-processing companies list, China Leather Industry is the fourth largest leather-processing enterprises in the world and the third largest leather processing companies in China. In 2017, the company has grown to be a leading manufacturer of leather products in China, and the exports of leather products to the United States, Europe, Japan, South Korea, and other countries have also continued to grow. In addition to processing leather, the company also has several processing departments in the operation, such as tanning, dyeing, forming and so on, so that the company is able to provide multiple services to customers. The company has made great achievements in the past. With the rapid development of the market, the company continues to introduce products such as leather shoes, high-quality innerwear, leather furniture, and leather products, among others 82157476af
