### What's New in the?

The Quick Multi-Languages Dictionary is a tool for finding word translations into multiple languages. It can store data for words from the Japanese, Vietnamese, Korean, and English languages. The source texts for the translated words can be imported from text files in the text encoding (TAR, BZ2, ZIP, DZ) or copied directly from the clipboard or into the main window. Moreover, you can modify the source text by changing the font size, font style, and color, as well as increase or decrease the text size. Moreover, there's a help manual available for this utility that includes short descriptions about the program's features. What's more, you can copy the translated words to the clipboard so they can be pasted into other third party-tools (like the Chinese WordPad, ZWXTerm, or Twinkle). As for the searching results, you can adjust the language, word family, region, and font style, as well as conduct a search for phonetic and ideographic words.
